

Gladstone Regional Seed Library

What is it?

A seed library collection is where the library loans out seeds instead of books or DVDs.

How does it work?

Gladstone Regional Library members borrow seeds for free then plant and tend to their crops. The return on this long-term loan is not fresh produce but instead the return of some seeds from the yield. These seeds are then made available for members to plant next season

Seed Donations:

The library is happy to accept donated seeds. When giving a donation you will be required to fill in a seed donation form with as much details about the plant as possible. Gladstone Regional Council are not accountable for the content of seed donations and any errors in the information provided with them.

Information Handouts:

This range of information sheets and activities have been designed to provide basic information on the seeds available and help teachers and parents encourage and inspire their children's interest in nature.

Curriculum Ideas:

Science: "living things"-parts of insects, plant pollination, honey production, insect life-cycles, types of honey, divisions of Animal Kingdom

Numeracy: measuring volume of honey in jars

Literacy: Create a bush tucker version of "The Very Hungry Caterpillar" by Eric Carle

Art: Botanical Illustrators (Ferdinand Lucas Bauer and "The Port Jackson Painter"), Illustrators (Sir Ernest Daryl Lindsay) – illustrate own story or inspiration for own artwork

History/geography: Distribution maps for bees (native and European), and butterflies

Let it Grow - #HomeMakerSpace

Combining the traditional Homemaker skills with the "give it a go" principle of technology focused Makerspace movement.

The "Let it Grow" – #HomeMakerSpace Project is designed to complement the current digital literacy programs currently run by Gladstone Regional Council Library Service, by offering a range of activities that draws upon a broad range of low-tech practical skills from the past and utilizing digital literacy training sessions to aid in the sharing and preservation of local knowledge and skills.
